Lighting. Res. Technol. **26**(4) 207 (1994) Printed in Great Britain L309

Contents list

Volume 26, 1994

Daylighting computation: Radiosity method using triangular patches	P R Tregenza	1
Cloud cover assessment for whole-sky images	C Wooldridge and S Hayman	9
Shooting algorithm for illuminance: Comparison of prediction with experiment	M Nithisoontorn	13
Road lighting: Assessment of an installation based on the contrast of a standard target	J Ménard and J Cariou	19
Cumulative index for Volumes 1–25 (1969–1993)		35
Visibility and lighting of wet road surfaces	J Lecocq	75
Effects of voltage drop on the rise time and light output of incandescent brake lamps on trucks	M Sivak, T Sato and M J Flannagan	89
Visual comfort in the daylit luminous environment: Structural model for evaluation	T Iwata, A Hatao, M Shukuya and K-I Kimura	91
Daylighting contribution in interior lighting: Experimental verification of software simulation results	L Bellia, A Cesarano and S Sibilio	99
Calculation of the indirect component of the horizontal illuminance	M B Kostic and N S Radovanovic	107
Appearance of lit environment and its relevance in lighting design: Experimental study	D L Loe, K P Mansfield and E Rowlands	119
Predicted brightness–luminance phenomena	H-W Bodmann and M La Toison	135
Perception of lighting and brightness from HID light sources	G J Levermore	145
Sky-glow conscious lighting design	N E Pollard	151
Amplitude modulation of light from various sources	N Andersson, M Sandström, A Berglund and K Hansson Mild	157
The need for standard skies and models for energy conservation measures	R Kittler	171
Evaluations of in-traffic performance of high-density discharge headlamps	M Sivak, M J Flannagan, E C Traube, D S Battle and T Sato	181
A self-commissioning adaptive lighting prediction algorithm	D A Coley and J A Crabb	189
Recovery time of the human eye after brief exposures to monochromatic glaring light	T Krebs, S Gloor, S Wüthrich, W Lüthy and H P Weber	195
Recovery time of the human eye after exposure to a glare source at various intensities	T Krebs, S Gloor, S Wüthrich, W Lüthy and H P Weber	199

Technical Notes

Drivers' headlight use: A lighting factoid	P R Boyce and J Fan	23
Standard obstructions for lighting calculations	A S M Leung, M J Lupton and D J Carter	161

Errata 169, 209
